Skills

Full Stack Multimedia Software Engineer by the University of Alicante. High knowledge in the sector of distributed multimedia systems (Both Back-End and Front-End). I consider myself a technology enthusiast, very active and willing to learn and create new things. I am always open to new challenges and opportunities, so do not hesitate to contact me on ramonmorcillodev@gmail.com.

Languages

Spanish - Native level

English - C1 level - Cambridge English: Advanced (CAE)

Experience

1millionbot, Front-End and Back-End Engineer
APRIL 2018 - PRESENT, ALICANTE

At this company we develop NLP chatbots to Universities and Companies mainly. Me and another colleague are in charge of both the Front-End and Back-End of the application plus the corpus of the chatbots and the requests with our API and external ones. We also control and manage the deployment and service status on Google's Cloud Ubuntu VMs with Nginx as a proxy server.

ITYIS, Software Engineer
JANUARY 2018 - APRIL 2018, ALICANTE

I worked as a Software Engineer on a team where we dedicated ourselves to complete an application already started with Symfony. Also started researching Natural Language Processing (NLP) technologies on a chatbots project which would become the core of 1millionbot. .

Education

University of Alicante, Multimedia engineering degree
ALICANTE

Inmaculada Jesuitas Alicante, Technological bachelor
ALICANTE

Achievements

Finding that what I do, creating any kind of software, is what I want to do in life, is my biggest achievement or at least one of them.
